

I have to tell you that I am surprised by the NAB trying to stop XM radio from broadcasting traffic and weather. What are they scared of? This is a private service that I choose to subscribe to. Why should they not be allowed to provide me with traffic and weather? THE NAB SHOULD NOT DICTATE WHAT I AM PERMITTED TO HEAR!!!!

The service XM provides is not available elsewhere.

I respectfully urge your commission to reject NAB's petition 04-160 and give XM the ability to provide the kind of programming I demand and deserve.

Respectfully,

David Frye II
